

What you need to know about the

CORONAVIRUS!

The Coronavirus (COVID-19) is a germ that is getting a lot of people sick. When sick people sneeze or cough the germ can fly across the room as far as 6 feet or more! That's pretty far for something so small. Then it can land on people, pets, doorknobs or tables and can get other people sick too! Let's work together so that fewer and fewer people get sick!

Don't be scared,
be smart!

Color this page and hang it up in your house for your whole family to see!

Clean your hands with soap and water
and flush those germs down the drain!

If you go outside, don't stand too close together.
Or even better, talk to your friends on the phone!

If you're sick, stay home and get plenty
of rest! It's a great time to read a book!

Always cover coughs and sneezes!
That's just good manners.

Wear a face mask if you are sick!
You probably don't need one if you're not sick.

Ask an adult how you can help
keep the house clean!
